MID | Models 1610 – 1612 without armrests | Models 1615 – 1617 with armrests | Models 1618 with armrests and high back

MID – a versatile family of chairs designed with a special focus on use in the medical environment. Due to its easy-to-clean detail solutions without visible screw connections and its comfort, MID is suitable as a chair in the patient room but also as a meeting chair in the conference room. It is stackable, and the seat and back are available in veneer and upholstered. A raised back cushion is also available. In the reduced design with clear lines and gentle organic curves of the molded wood elements, features of the eponymous Mid-century modern style are reflected.
