

MICRO CARE BLUE®

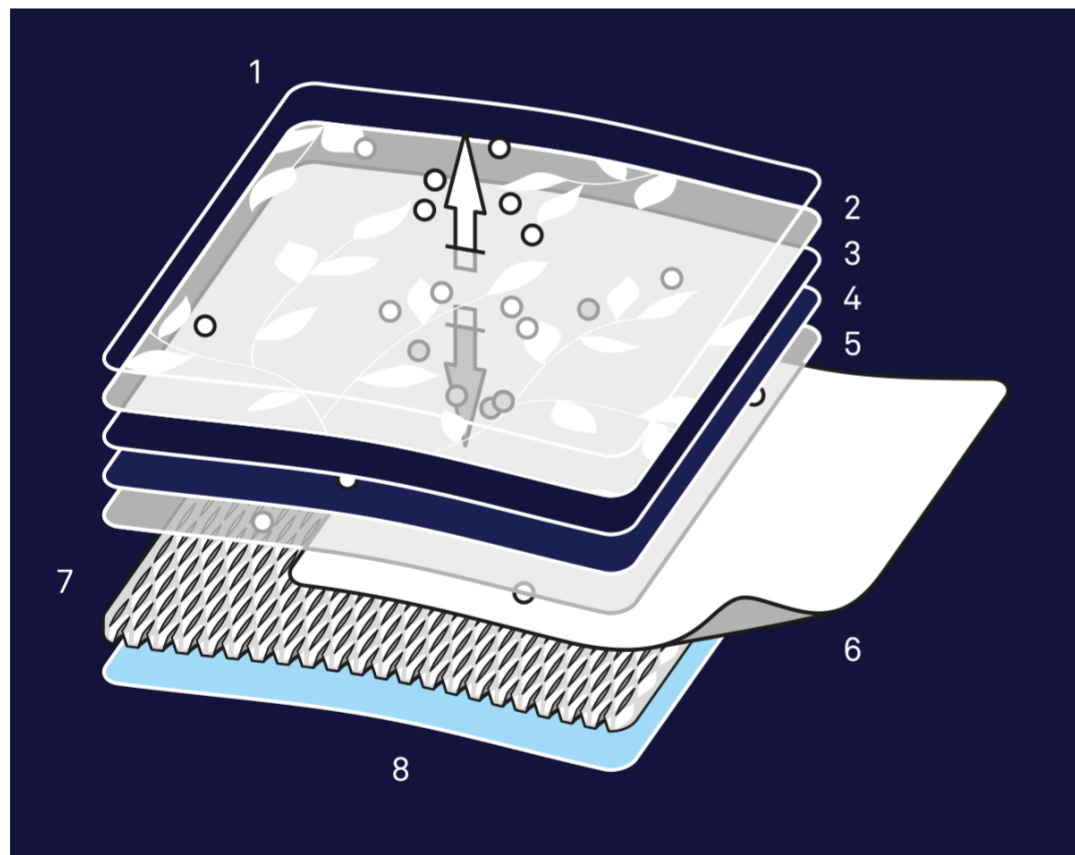

www.microcare.nl

SUEDE

PRODUCT CHARACTERISTICS

Soft, supple and comfortable fabric with a new brushed suede effect
Material Base cloth: 100 % polyester (Suede = 100 % micro-fibre polyester)
Material Backing: 100 % PU polyurethane water and urine proof backing
NANO-CLEAN® anti stain finish
Easy to clean
Fire-resistant to BS 5852, 1+2 Ignition source 5,
EN 1021 1+2, DIN 4102 B1, UNI 9175/FA1:1.IM
Hardwearing (> 70.000 rubs Martindale)
Non sticky because of its high-tech MEMBRANE-COMFORT® technology
NANO-SILVER® antibacterial technology
Environmentally friendly
Width is 140cm
Roll length is 30 meters
Price on request

1. NANO-CLEAN® EASY CLEAN TECHNOLOGY

A revolutionary Nano-technology surface treatment that guarantees significantly better anti-stain and liquid repellency results

2. The printing of the various patterns

3. The colorfast dyeing process

4. The special sueding treatment

5. NANO-SILVER® ANTI BACTERIAL TECHNOLOGY

Millions of Nano-Silver particles are engineered into the fabric. This deposit of Nano-Silver actively stops the growth of bacteria such as MRSA - 99,9% within 2-4 hours

6. The microfibre polyester base fabric

7. MEMBRANE COMFORT TECHNOLOGY®

The revolutionary airflow and waterproof film

8. The flame retardant coating

Cleaning Instructions

For easy cleaning purpose we have impregnated the entire microfibre fabric with millions of NANO-CLEAN® particles to create optimal anti-soil and water-resistance. In care of persistent stains please use luke-warm water and a household soap (ask for our cleaning instructions).
